Story The 21st century. Scientific progress has resulted in a highly advanced civilization. Unfortunately the Earth's natural resources have been depleted as a consequence. The search for resources turns to outer space. The Starlight Plan A fleet of six squadrons with 5,000 members will embark on a reconnaissance mission to search for resources vital to the Earth's existence. Due to the development of the "Bias Drive", (mankind's first warp drive system), this fleet is able to explore deeper into space than has ever been done before. Just four months into the mission, however, all contact is suddenly lost. A desperate search by the Earth's government is unable to uncover the cause of the fleet's disappearance. Three years later.... Suddenly, the Fleet returns, but they have been consumed by alien life forms! Now they call themselves the "Zeograde Army", and they have come to attack the Earth! The Earth's army is unprepared for this sudden invasion by aliens. But, there is one scientist who has foreseen this apocalyptic event, and who has been preparing for it ever since contact was lost with the reconnaissance fleet. His name; John Howard. His invention; Soldier Blade, a heavy fighter craft equipped with a miniature Bias Drive, designed especially for alien attack. However, his work is rejected by the Association of Scientists, and he is expelled from the organization. Now he is working with the military-run SIA team.

The Special Interception Air force. Sounds nice, but look a little closer. Each team member is a maverick-- a dropout from society.

The crew:

Edward J Max; mechanic.

Amelia Air Heart; communications officer.

Raizo Fudo; SIA Chief.

Sho Kazamori; pilot.

John Howard; SIA science officer.

The SIA team is the Earth's last choice for a world defense, force, but all other forces have already been deployed for combat and the motley team is the Earth's only remaining alternative.

Bay Wolf

Missile Ship

A large-sized, high-speed fighter. It materializes suddenly in front of your ship and fires 4 big missiles from its missile pods.

Enemies

Multi-Warhead Missile Stinger

A mid-sized fighter that appears in groups. It attacks suddenly, and when destroyed it releases missiles in 5 directions.

Leos Alpha

Large robots transported on carriers. When they get in front of your ship they fire missiles.

Z-6 Way

Approaches slowly from the front, releasing missiles in 6 directions as it flies. It can withstand a lot of firepower, so it is best to destroy it with one blast when it gets close.
